2011 founded

Mission

Be the operating backbone for Mizan's manufacturing and distribution — and the GCC's most reliable independent cold-chain operator. 99%+ cold-chain integrity, 96%+ OTIF.

Strategic intent

Earn the right to NUPCO + giga-hospital cold-chain tenders via the new Dammam hub. Defuse anchor-customer concentration. Become the captive backbone for Mizan Pharma Distribution + Manufacturing while building a 42% third-party 3PL book.

Current state, mid-2026

Mizan Pharma Logistics is quietly excellent. OTIF at 96.2% (90-day rolling), cold-chain integrity rate 99.4%, EBITDA margin 18.2% in 2026F. The 384-vehicle GDP-WHO certified fleet + 62,000 m² of cold-chain warehouse is the only fully integrated private-sector cold-chain spine in KSA. The one watch item is the NUPCO anchor contract (14% of revenue) up for renewal with the client RFP issued.

The KSA pharma logistics cold chain market

The KSA pharma logistics cold chain market is sized at **SAR 8.5B** in 2026 (forecast), growing at **21.4%** for the year and a projected **17.6–20.0%** CAGR through 2028. Pharma Logistics's 2026 revenue of SAR 540M implies a market share of approximately **6.4%**.

	2024A	2025A	2026F	2027F	2028F
Market size (SAR B)	6	7	8.5	10	12
Market growth %	+15.0%	+16.7%	+21.4%	+17.6%	+20.0%
Pharma Logistics revenue (SAR M)	420	480	540	615	700
Pharma Logistics share	7.00%	6.86%	6.35%	6.15%	5.83%

Demand drivers

Cold-chain SKU share rising from 18% (2024) to 32% (2028) — biologics, GLP-1s, vaccines, oncology. SFDA Tatmeen track-and-trace mandates GDP-WHO compliance. Mega-hospitals + insurer telehealth pulling cold-chain demand.

Regulatory environment

SFDA Good Distribution Practice (GDP) certification; MoT Transport General Authority; Saudi Ports (Mawani) for bonded import cold-chain.

Vision 2030 programme linkages

Drug Security Strategy · Saudi Logistics Hub · Cold-Chain Compliance Initiative.

How we compete in Pharma Logistics

Our 2028 ambition is not to be the largest by revenue but to be the most integrated by capability and the most disciplined by margin. The competitive set is anchored by a handful of named operators below.

Competitor	2025 Rev (SAR M)	2025 EBITDA %	Strategic posture
GAC Logistics KSA	680	12.0%	Pan-regional; pharma + FMCG.
Mizan Pharma Logistics (us)	480	17.4%	Earn the right to NUPCO + giga-hospital cold-chain tenders via the new Dammam hub. Defuse anchor-customer concentration. Become the captive backbone for Mizan Pharma Distribution + Manufacturing while building a 42% third-party 3PL book.

Biggest competitive threat to manage

Anchor-customer concentration. NUPCO at 14% of revenue is the single biggest commercial risk in the BU. Mohebi Logistics is the most credible challenger on cold-chain; DHL Supply Chain Pharma on biologics specifically.

Biggest competitive opportunity to capture

Captive Tamween integration completes Q3-2026 — adds ~SAR 280M of internal revenue and 18,000 m² of inherited cold-chain capacity. Operating leverage from captive volume estimated at +180bps of segment EBITDA by 2028.

Revenue, EBITDA, cash and operating KPIs — 2026-2028.

Financial trajectory

	2024A	2025A	2026F	2027F	2028F
Revenue (SAR M)	420	480	540	615	700
YoY growth	—	+14.3%	+12.5%	+13.9%	+13.8%
EBITDA margin %	16.5%	17.4%	18.2%	19.5%	21.0%
EBITDA (SAR M)	69	83	98	119	147

2026 operating KPIs (Pharma Logistics-specific)

Metric	Value 2026
Fleet (GDP-certified vehicles)	384
Cold-chain warehouse (m²)	62,000
Cold-chain integrity rate	99.4%
OTIF (rolling 90d)	96.2%
Captive vs 3rd-party rev split	58 / 42
Largest customer concentration	NUPCO 14% of revenue

The four to six things we will do that matter.

The plan is operationalised through the discrete initiatives below. Each has a named owner (the BU CEO) and a quarterly milestone reported through the StrategyOS Monday Brief.

1. Dammam cold-chain hub — 18,000 m² GDP-WHO compliant, commissioning Q2-2026
2. Tamween captive integration — 12 warehouses absorbed Q3-2026
3. GLP-1 + biologics cold-chain capacity expansion — Riyadh + Jeddah
4. EV cold-chain pilot — 24 vehicles Riyadh and Jeddah, partnership with Ceer
5. Anchor NUPCO contract renewal — 14% of revenue, RFP imminent

Vision 2030 programme alignment

Saudi Logistics Hub · Drug Security Strategy · Cold-Chain Compliance Initiative

06 · BU-LEVEL RISKS

What could break the plan.

R-02 — Cold-chain integrity failure **Impact: H · Likelihood: L**

A single cold-chain breach on a biologic or vaccine shipment would trigger SFDA recall, reputational damage, and direct loss. Sector-wide events have cost peers SAR 80-180M per incident.

Mitigation: GDP-WHO certified vehicles + warehouses; real-time IoT temperature monitoring on all cold-chain shipments; 99.4% integrity rate currently; insurance cover SAR 200M aggregate.

R-03 — Anchor NUPCO contract concentration **Impact: M · Likelihood: M**

NUPCO contract accounts for 14% of Pharma Logistics revenue (and ~6% of Distribution). RFP renewal H2-2026; competitive pressure from Mohebi and DHL.

Mitigation: Dammam cold-chain hub commissioning Q2-2026 demonstrates capability; defensive pricing + scope expansion proposal; private-customer pipeline being built to defuse concentration.

R-10 — E-pharmacy regulatory headwind **Impact: M · Likelihood: L**

SFDA online-pharmacy framework still evolving; possible scope restrictions on direct-to-consumer cold-chain Rx; competitive entry by Amazon Pharmacy / multinational players.

Mitigation: Active SFDA engagement; click-and-collect channel as buffer; NPHIES integration moat; bundled clinical services.

07 · CAPITAL ASK 2026-2028

Investment to deliver the plan.

Cumulative capital ask 2026-2028: SAR 280M. Funded from a combination of BU-generated cashflow, group capital recycling, and the SAR 2.65B group envelope. Note: *Dammam cold-chain hub commissioning, GLP-1/biologics capacity expansion, EV cold-chain pilot,*

network IT.

Governance

BU CEO is the named owner of every initiative and every number in this plan. Monthly performance is reviewed at the Executive Committee. Quarterly progress is reported to the Board. The Monday Brief surfaces variance vs plan in real time.

BU sponsor: Tariq Al-Ghamdi, CEO Mizan Pharma Logistics.

Group oversight: Khalid Al-Rashed, Group CEO.

Plan effective from: 12 January 2026 (Board-approved).
