Mission

Build the operating system for primary care in Saudi Arabia — patient app, clinician dashboard, AI triage, and population-health platform.

Strategic intent

Be the operating system for primary care in Saudi Arabia. Bundle into payer + employer contracts. AI prescribing co-pilot as differentiator vs pure-play telehealth competitors.

Current state, mid-2026

Mizan Digital Health is the highest-margin BU at 19.2% EBITDA in 2025 and rising to 32% by 2028. Founded 2021, the platform now has 920k MAU and runs 142k consultations per month. NPHIES Tier-1 partnership in place since 2024. 38 B2B contracts with insurers and employer groups (~520k covered lives).

The KSA digital health market

The KSA digital health market is sized at **SAR 5.4B** in 2026 (forecast), growing at **42.1%** for the year and a projected **38.9–33.3%** CAGR through 2028. Digital Health's 2026 revenue of SAR 380M implies a market share of approximately **7.0%**.

	2024A	2025A	2026F	2027F	2028F
Market size (SAR B)	2.6	3.8	5.4	7.5	10.0
Market growth %	+41.0%	+46.2%	+42.1%	+38.9%	+33.3%
Digital Health revenue (SAR M)	195	280	380	510	680
Digital Health share	7.50%	7.37%	7.04%	6.80%	6.80%

Demand drivers

PIF AI infrastructure programme; insurer mandates (Bupa, Tawuniya) for telehealth; SDAIA NLP capability; Sehhaty platform expansion; aging demographic + chronic disease management.

Regulatory environment

SDAIA + NDMO (health data sovereignty); MoH (telehealth licensing); CCHI / Saudi Insurance Authority (reimbursement); SFDA (digital therapeutics).

Vision 2030 programme linkages

How we compete in Digital Health

Our 2028 ambition is not to be the largest by revenue but to be the most integrated by capability and the most disciplined by margin. The competitive set is anchored by a handful of named operators below.

Biggest competitive threat to manage

Aster Telehealth (UAE) at SAR 540M and Altibbi (pan-regional) at SAR 420M — both larger; Aster better-funded; Altibbi stronger on Arabic NLP. Public Sehhaty platform is a partnership opportunity, not competition in our core.

Biggest competitive opportunity to capture

AI prescribing co-pilot. Saudi-data-resident LLM for clinical workflow — drug-drug interaction + dosage guidance + chronic disease pathway alignment — is the genuine product moat. First-party deployment at Mizan Healthcare Services Q4-2026; external clinician roll-out Q2-2027.

Revenue, EBITDA, cash and operating KPIs — 2026-2028.

Financial trajectory

	2024A	2025A	2026F	2027F	2028F
Revenue (SAR M)	195	280	380	510	680
YoY growth	—	+43.6%	+35.7%	+34.2%	+33.3%
EBITDA margin %	15.5%	19.2%	24.0%	28.5%	32.0%
EBITDA (SAR M)	30	53	91	145	217

2026 operating KPIs (Digital Health-specific)

Metric	Value 2026
Telehealth consultations (monthly)	142000
Active patient app MAU	920000
Connected clinicians	8400
B2B platform contracts (insurers + employers)	38
NPHIES integration	Live — Tier 1 partner since 2024
AI Rx interactions checked / month	2.1M

The four to six things we will do that matter.

The plan is operationalised through the discrete initiatives below. Each has a named owner (the BU CEO) and a quarterly milestone reported through the StrategyOS Monday Brief.

1. AI prescribing co-pilot — drug-drug interaction + dosage + interaction with chronic disease guidelines
2. Population-health analytics product — partnership with 6 employer groups (~520k covered lives)
3. Bupa Arabia + Tawuniya master telehealth contracts — re-signed Q1-2026
4. Saudi NLP medical assistant — Arabic-language consultation transcription + summarisation
5. NDMO Tier-3 sovereign deployment — completed Q1-2026 for clinical data

Vision 2030 programme alignment

Health Sector Transformation · Digital Health Strategy · NPHIES Platform · Sehhaty integration

06 · BU-LEVEL RISKS

What could break the plan.

R-07 — Cyber / health-data sovereignty **Impact: H · Likelihood: L**

NDMO data-classification audit Q4-2026; Digital Health and E-Pharmacy hold sensitive patient data. Non-sovereign LLM use is a finding-risk under tier-3 guidelines.

Mitigation: StrategyOS sovereign Tier-3 deployment in place; NDMO pre-engagement clean; data-locality controls enforced.

07 · CAPITAL ASK 2026-2028

Investment to deliver the plan.

Cumulative capital ask 2026-2028: SAR 120M. Funded from a combination of BU-generated cashflow, group capital recycling, and the SAR 2.65B group envelope. Note: *AI prescribing co-pilot, NLP medical assistant, B2B platform sales infrastructure.*

Governance

BU CEO is the named owner of every initiative and every number in this plan. Monthly performance is reviewed at the Executive Committee. Quarterly progress is reported to the Board. The Monday Brief surfaces variance vs plan in real time.

BU sponsor: Dr. Lina Al-Otaibi, CEO Mizan Digital Health.

Group oversight: Khalid Al-Rashed, Group CEO.

Plan effective from: 12 January 2026 (Board-approved).
