Mission

Optimise group capital structure, recycle stabilised assets, and run a disciplined healthcare-sector principal investment book.

Strategic intent

Optimise group capital structure, run capital recycling on stabilised assets, debut sustainability-linked sukuk H2-2026, prepare for 2028 partial-IPO optionality.

Current state, mid-2026

Mizan Capital is the smallest BU by headcount (180) but punches well above its weight on the group balance sheet. AUM SAR 2.42B principal book (healthcare-focused), SAR 1.48B group cash managed, 42% EBITDA margin. The May 2026 manufacturing capacity refinancing closed SAR 220M at 5.2% fixed, 30bps inside Treasury guidance, releasing SAR 92M of equity.

The KSA financial services market

The KSA financial services market is sized at **SAR 95B** in 2026 (forecast), growing at **10.5%** for the year and a projected **10.5–9.5%** CAGR through 2028. Capital's 2026 revenue of SAR 250M implies a market share of approximately **0.3%**.

	2024A	2025A	2026F	2027F	2028F
Market size (SAR B)	78	86	95	105	115
Market growth %	+8.0%	+10.3%	+10.5%	+10.5%	+9.5%
Capital revenue (SAR M)	175	215	250	290	340
Capital share	0.22%	0.25%	0.26%	0.28%	0.30%

Demand drivers

Sukuk issuance volumes; CMA-led market deepening; healthcare-sector PE expansion; insurance penetration; PIF asset-allocation knock-on to KSA capital markets.

Regulatory environment

Saudi Central Bank (SAMA); Capital Market Authority (CMA); Saudi Insurance Authority.

How we compete in Capital

Our 2028 ambition is not to be the largest by revenue but to be the most integrated by capability and the most disciplined by margin. The competitive set is anchored by a handful of named operators below.

Competitor	2025 Rev (SAR M)	2025 EBITDA %	Strategic posture
Al Rajhi Capital	1,640	48.0%	Al Rajhi Bank owned.
GIB Capital	520	40.0%	Gulf International Bank arm.
EFG-Hermes KSA	420	36.0%	Egypt-HQ; regional capital markets.
Mizan Capital (us)	215	40.8%	Optimise group capital structure, run capital recycling on stabilised assets, debut sustainability-linked sukuk H2-2026, prepare for 2028 partial-IPO optionality.

Biggest competitive threat to manage

Rate environment surprise. The SAR peg protects partially but SAIBOR moves with the Fed and our floating-rate debt book is SAR 1.6B. Healthcare-PE bid competition is intensifying from Jadwa and regional sovereign-PE funds.

Biggest competitive opportunity to capture

Sustainability-linked sukuk debut H2-2026 — SAR 600M, KPI-linked to Saudi-Made pharma share + cold-chain integrity rate. Lengthens the debt-maturity profile and signals institutional-grade ahead of any 2028 partial-IPO consideration.

Revenue, EBITDA, cash and operating KPIs — 2026-2028.

Financial trajectory

	2024A	2025A	2026F	2027F	2028F
Revenue (SAR M)	175	215	250	290	340
YoY growth	—	+22.9%	+16.3%	+16.0%	+17.2%
EBITDA margin %	39.5%	40.8%	42.0%	43.5%	44.5%
EBITDA (SAR M)	69	87	105	126	151

2026 operating KPIs (Capital-specific)

Metric	Value 2026
AUM (principal book, healthcare-focused)	SAR 2.42B
Group cash managed	SAR 1.48B
Average cost of debt	5.2%
Refinancings closed YTD	3
Equity released YTD	SAR 92M

The four to six things we will do that matter.

The plan is operationalised through the discrete initiatives below. Each has a named owner (the BU CEO) and a quarterly milestone reported through the StrategyOS Monday Brief.

1. Manufacturing capacity refinancing — closed May-2026, SAR 220M @ 5.2% fixed, 30bps inside guidance
2. Sukuk programme (healthcare-sustainability-linked) — SAR 600M, debut planned H2-2026
3. Healthcare PE — pre-screened pipeline of one regional pharmacy chain, one digital-health platform, one specialty manufacturer
4. CMA listing-readiness diagnostic — for 2028 partial IPO consideration

06 · BU-LEVEL RISKS

What could break the plan.

R-01 — Active Pharmaceutical Ingredient (API) supply concentration **Impact: H · Likelihood: M**

~74% of Mizan's API supply is sourced from India and China. Trade-flow disruption, FX shocks, or regulatory action would compress manufacturing margin within 60-90 days.

Mitigation: Dual-source qualification programme (target 100% of top-50 APIs dual-sourced by 2028); 90-day strategic safety stock on essential APIs; Lifera partnership for local biosimilar capacity.

R-05 — FX exposure (EUR, CHF, USD on imports) **Impact: M · Likelihood: M**

EUR-denominated specialty imports SAR 280M/yr; CHF (Roche, Novartis) SAR 140M/yr. EUR rose 4.05 to 4.21 (2024 → 2026). Hedge programme covers 60%; AP discipline gap caused leakage.

Mitigation: Tighten Treasury/AP integration; 80% hedge target by Q4-2026; Tamween FX leakage remediation underway (see POC/01_Synthetic_Dataset/).

R-08 — Reimbursement compression **Impact: M · Likelihood: M**

Bupa Arabia + Tawuniya annual rate negotiations. Insurers under MEDPRO + new SIA cost-discipline; reimbursement rate cuts of 2-5% plausible at next renewal.

Mitigation: Specialty-mix shift; Mizan Digital Health bundling reduces sensitivity; insurer diversification.

R-09 — Cash leakage and controls (Distribution BU) **Impact: L · Likelihood: M**

H1-2026 finance audit identified ~SAR 1.2M of recoverable cash leakage across 8 patterns (see POC/01_Synthetic_Dataset/). Patterns include duplicate vendor payments, missed early-pay discounts, FX hedge mis-application, and dormant credit balances.

Mitigation: Controls remediation programme; SAP S/4HANA migration Q3-2026; group-wide controls SOP rollout.

07 · CAPITAL ASK 2026-2028

Investment to deliver the plan.

Cumulative capital ask 2026-2028: SAR 105M. Funded from a combination of BU-generated cashflow, group capital recycling, and the SAR 2.65B group envelope. Note: *Sukuk programme set-up, listing-readiness diagnostic, principal-book deployment.*
