

KSA Digital Health & Telehealth — 2026 Outlook

Q2 2026 — Published 26 May 2026

Prepared by Mizan Office of Strategy + Group Research for use within Mizan Group strategic planning. Sourced from public-domain statistics, sell-side and industry research, and Mizan internal proprietary data. Not for redistribution.

AI prescribing + NPHIES = the next-decade differentiator

The KSA digital health market is sized at SAR 5.4B in 2026 and growing 42% YoY — the second-fastest-growing health sub-sector after e-pharmacy. Three drivers: PIF AI infrastructure programme accelerating Saudi AI capability; insurer mandates (Bupa, Tawuniya) for telehealth; SDAIA NLP capability enabling Arabic-language clinical workflows.

Margins are healthy and rising — software-services economics. The peer set runs 15-24% EBITDA and is converging upward as fixed-cost amortisation compounds. Mizan Digital Health at 19.2% in 2025 lifts to 32% by 2028 — the highest in the Mizan portfolio.

AI prescribing co-pilot is the next-decade differentiator. Drug-drug interaction checking + dosage guidance + chronic-disease pathway alignment is the genuine clinical-value moat. Mizan's launch is Q4-2026 at Mizan Healthcare Services; external clinician roll-out Q2-2027.

KSA digital health market through 2028

Sized at **SAR 5.4B** in 2026 forecast, the market is growing at **42.1%** for the year and a projected **38.9%** in 2027 onward.

	2024A	2025A	2026F	2027F	2028F
Market size (SAR B)	2.6	3.8	5.4	7.5	10.0
YoY growth %	+41.0%	+46.2%	+42.1%	+38.9%	+33.3%

Structural demand drivers

PIF AI infrastructure programme; insurer mandates (Bupa, Tawuniya) for telehealth; SDAIA NLP capability; Sehhaty platform expansion; aging demographic + chronic disease management.

Cyclical / near-term factors

- PIF AI infrastructure programme — direct sovereign demand creation.
- Bupa Arabia + Tawuniya bundled-telehealth contracts maturing.
- Sehhaty public platform extending — partner not competitor in core.
- Arabic-language NLP capability lifting consultation quality.

The named players in KSA digital health

#	Player	2025 Rev (SAR M)	EBITDA %	2025 Notes
1	Aster Telehealth	540	17.2%	UAE-led; KSA expansion underway.
2	Altibbi	420	15.5%	Pan-regional; Arabic-language telehealth.
3	Cura	280	18.0%	KSA telehealth pioneer; Bupa partner.
4	Whites Connect	190	22.0%	Bundled telehealth + e-pharmacy.
5	Sehhaty Platform (MoH)	0	0.0%	MoH public platform; partner, not competitor in core.

Competitive dynamics — our reading

Aster Telehealth (UAE) at SAR 540M is the regional scale leader expanding into KSA. Altibbi (pan-regional) at SAR 420M is the Arabic-NLP specialist.

Cura (KSA-native) at SAR 280M is the local pioneer; Bupa Arabia partner. Whites Connect at SAR 190M bundles telehealth with e-pharmacy.

Sehhaty (MoH public platform) is a partnership opportunity, not competition in core — Mizan integration in production since 2024.

Mizan Digital Health at SAR 280M is mid-scale and fastest-growing on EBITDA-margin trajectory. AI prescribing co-pilot is the product moat.

Who regulates what, and what's changing

SDAIA + NDMO (health data sovereignty); MoH (telehealth licensing); CCHI / Saudi Insurance Authority (reimbursement); SFDA (digital therapeutics).

SDAIA + NDMO consumer health data residency rules in force; Tier-3 sovereign deployment required for clinical data.

MoH telehealth licensing — Mizan licensed Class A.

CCHI / Saudi Insurance Authority sets telehealth reimbursement; bundled-consultation pricing models maturing.

SFDA digital therapeutics framework emerging; opportunity space.

05 · VISION 2030 LINKAGES

Programme exposure and demand pull

Digital Health Strategy · Health Sector Transformation Program · NPHIES Platform · SDAIA AI Strategy.

Digital Health Strategy — explicit support for telehealth + AI + integrated platforms.

NPHIES Platform — unified national e-prescription + EHR.

SDAIA AI Strategy — sovereign capability building.

Sehhaty patient platform — public-private partnership.

What could break the outlook

Sovereign data + AI compliance

NDMO Tier-3 framework applies. Non-sovereign LLM use is finding-risk. Mizan compliant via StrategyOS architecture.

Insurer reimbursement

Bupa + Tawuniya pricing for bundled telehealth + Rx + clinical may compress; Mizan diversifies via employer-direct contracts.

Multinational entry

Aster expanding aggressively. Defence: NPHIES integration depth + Saudi data sovereignty + cross-BU bundling.

07 · MIZAN IMPLICATIONS

What this means for our portfolio

AI prescribing co-pilot launch Q4-2026 is the keystone product event — internal at Mizan Healthcare Services first, then external clinician roll-out Q2-2027.

920k MAU + 142k consultations/month creates the cross-BU funnel — feeds Mizan Pharmacy Retail + E-Pharmacy + Healthcare Services.

Sovereign Tier-3 deployment is the regulatory moat — multinationals struggle on data residency.

B2B platform contracts (insurers + employers) are the revenue compounding mechanism.
