

KSA E-Pharmacy & Online Health — 2026 Outlook

Q2 2026 — Published 24 May 2026

Prepared by Mizan Office of Strategy + Group Research for use within Mizan Group strategic planning. Sourced from public-domain statistics, sell-side and industry research, and Mizan internal proprietary data. Not for redistribution.

NPHIES integration unlocked Rx conversion; same-day delivery scaling

The KSA e-pharmacy market is sized at SAR 7.2B in 2026 and growing 41% YoY — the fastest-growing pharma channel by a wide margin. NPHIES e-prescription integration roll-out has been the inflection: Rx eligibility for online doubled in 2025 alone.

The market structure is bifurcated: pure-play online natives (Whites Pharmacy Online, Aman Online, Care'n Cure UAE) versus captive online channels of physical chains (Al-Nahdi Online as the scale leader). Mizan E-Pharmacy at SAR 470M is mid-scale but the fastest-growing among independents.

Margins are improving rapidly as fixed-cost amortisation kicks in — the sector moved from loss-making in 2022 to 7-11% EBITDA in 2025. Mizan's 6.8% lifts to 12.5% by 2028 as same-day infrastructure compounds.

KSA e pharmacy market through 2028

Sized at **SAR 7.2B** in 2026 forecast, the market is growing at **41.2%** for the year and a projected **36.1%** in 2027 onward.

	2024A	2025A	2026F	2027F	2028F
Market size (SAR B)	3.4	5.1	7.2	9.8	12.4
YoY growth %	+38.0%	+50.0%	+41.2%	+36.1%	+26.5%

Structural demand drivers

NPHIES e-prescription roll-out doubling Rx-eligible share; post-COVID delivery habit retention; insurer-led omnichannel; same-day delivery infrastructure maturity; female workforce drove convenience demand.

Cyclical / near-term factors

- NPHIES adoption is the dominant lever — every 10pt rise in e-Rx adoption lifts e-pharmacy Rx volume directly.
- Female workforce participation has structurally lifted convenience-led demand.
- Post-COVID delivery habits persisted; same-day expectations now baseline.
- Insurer-led omnichannel — Bupa + Tawuniya pushing patients to digital channels.

The named players in KSA e pharmacy

#	Player	2025 Rev (SAR M)	EBITDA %	2025 Notes
1	Al-Nahdi Online	1,640	11.4%	Captive online arm of Al-Nahdi; click-and-collect dominant.
2	Whites Pharmacy Online	920	9.5%	Largest pure-play e-pharmacy in KSA.
3	Aman Pharmacies Online	520	7.8%	Strong same-day delivery; growing.
4	Care'n Cure UAE	340	8.5%	UAE-based; expansion to KSA exploratory.

Competitive dynamics — our reading

Al-Nahdi Online at SAR 1.64B is the captive scale leader — dominant click-and-collect through the 1,200 physical stores. Different competitive shape; their integrated story is hard to match without physical scale.

Whites Pharmacy Online at SAR 920M is the largest pure-play; strong app + same-day execution. Closest direct competitor for share of pure-online basket.

Aman Online (SAR 520M) + Care'n Cure (UAE, SAR 340M) round out the named set. Amazon Pharmacy potential entry is the headline tail risk.

Mizan E-Pharmacy at SAR 470M is the second-largest pure-play after Whites and the fastest-growing. Differentiation is bundle with Mizan Digital Health consultation + Mizan Pharmacy Retail click-and-collect + cold-chain via Mizan Pharma Logistics.

Who regulates what, and what's changing

SFDA online-pharmacy licensing; NPHIES (e-prescription); SDAIA + NDMO (consumer health data); MoCom (e-commerce).

SFDA online-pharmacy licensing framework formalised 2024; cold-chain handling rules tightening.

NPHIES integration is the Tier-1 partnership category — Mizan and Whites are both Tier-1 partners.

SDAIA + NDMO consumer health data residency rules in force; Mizan compliant on Tier-3 sovereign deployment.

MoCom e-commerce regulation general; ZATCA Phase II e-invoicing applies.

05 · VISION 2030 LINKAGES

Programme exposure and demand pull

Digital Health Strategy · NPHIES Platform · E-Commerce Saudi.

Digital Health Strategy — explicit support for e-pharmacy + telehealth integration.

NPHIES Platform — unified national e-prescription backbone.

Saudi E-Commerce strategy — broader policy support for online channels.

What could break the outlook

Amazon Pharmacy / multinational entry

If Amazon launches KSA pharmacy, scale pressure on independents. Mizan defends via NPHIES integration depth + cold-chain + Mizan Healthcare Services bundle.

SFDA online-pharmacy scope tightening

Possible restrictions on direct-to-consumer cold-chain Rx. Active SFDA engagement is the controllable.

Same-day delivery economics

Tier-2 city expansion lifts cost per order. Volume threshold needed before unit economics turn positive.

07 · MIZAN IMPLICATIONS

What this means for our portfolio

NPHIES Tier-1 partnership is the structural advantage — drives 61% Rx-as-share-of-orders versus mid-50s for non-Tier-1 peers.

Same-day delivery expansion to Tier-2 cities (Q3-2026) is the next growth vector; dark-pharmacy build-out funded.

Bundle with Mizan Digital Health consultation + delivery + clinical-services is the cross-BU moat.

AI prescription verification (drug-drug interaction + dosage flags) is the differentiated capability — partnership with Mizan Digital Health.
